(a) Populations shown above represent the population at the Census of 30th June, 1954, plus allowances for natural increase and net migration since the Census. As records of interstate and intrastate migration are incomplete, the estimates so derived are approximate and subject to revision when the 1961 Census results become available. Such revision was substantial after the 1954 Census. The metropolitan population is estimated each quarter as accurately as possible with the limited data available for intrastate migration.

(b) Excess of births over deaths.

(c) At the end of the period shown.

(a) The index numbers relate to the prices of ordinary shares on the Brisbane Stock Exchange of a total of 75 companies incorporated in Queensland. The prices of individual shares are unweighted and each group average is the mean of the latest selling prices each month per £1 of paid-up capital. Adjustments are made for changes in the capital structure of the companies.
